Total Sq. Footage:	<u>738</u>	Renovation Information:	<u>N/A</u>
Floors:	<u>1</u>	Current Building Status:	<u>Existing</u>

Sources of Information (*Document No's Used, Interviews, etc.*)

- Document Reviews – None
- Site Visit and Interviews – Ref. 008

Radiological Data Summary (*RCOPCs, Impacted Room(s) / Area(s), etc.*)

It was confirmed that none of the batteries tested would contain radioactive materials. No indications of radiological materials or contamination were observed.

Preliminary MARSSIM Classifications

Non-Impacted

Site Visit Information: (*Date Toured, Site Contact, Security Issues, Photos Taken*)

Site visit conducted June 11, 2006 by Bob Dover, accompanied by representatives from Shaw Environmental. Site contact is Tony Pellegrino, the Facility Manager. Site visit included interview with building operators, visual inspection, and photographs.

Additional Information

Environmental tests have been done on batteries at this location for approximately 30 years; during testing, explosions may occur as a result; test chambers are sealed to prevent any contamination from battery contents, and chambers are decontaminated afterwards with cleaning materials disposed of as hazardous materials.
